MATTHEW DELGADO

OBJECTIVE

Prospective Software Engineer with 10+ years of effective communication in customer facing and high-stress positions. Seeking a career change that will better leverage my innovative and creative nature, effective written and oral communication skills, ability to build strong and trusting relationships, and complex problem resolution.

Self-motivated and enthusiastic worker looking to combine my passion for technology, education, and helping others to further develop in this new career path. Bringing forth a proven track record of achievement and a reputation for positive collaboration. Committed to driving effective and successful outcomes.

TECHNICAL SKILLS

FRONT END: HTML5, CSS3, Tailwind, React, Bootstrap, JQuery, Javascript, React, JWT Authorization
BACK END: NodeJS, OOP, MVC, ExpressJS, Express-Session, mySQL, Sequelize, ORM, Jest, Bcrypt, MongoDB, Mongoose, ODM, GraphQL, Apollo, PWA's

PROJECTS

FULL STACK DEVELOPER
SHERPA STUDIOS, Github:https://github.com/DelgaMatt/Software-Sherpas-Extended
Deployed App: https://sherpa-studios.herokuapp.com/
- A MERN-stack application that displays the portfolio, events, and most recent songs of up and coming artists signed to Sherpa Studios.
- Artists will have the option to create a portfolio page upon registration and can access their personal information and update portfolio and upcoming events from their dashboard. Utilizes Spotify API..
- Role: MongoDB implementation, React routing and graphQL API, User Authorization, artist portfolio template design
- Tools: Javascript, NodeJS, OOP, Express.JS, MongoDB, React, Handlebars.js, JWT, Bcrypt, Apollo, GraphQL

BACK END DEVELOPER
BEER 'N' BITES, Github: https://github.com/delgamatt/beer-n-bites
Deployed App: https://beer-n-bites.herokuapp.com/
- A Full-stack application that displays generated food and beer pairings.
- Provides an intuitive and dynamic UI. Users have the option to save pairings upon registration and can access their pairings and dish recipe information from their dashboard. Utilizes PUNK API and Spoonacular API.

- Role: Database implementation, Express routing and server-side restfulAPI, Authorization, Carousel logic and UI
- Tools: Javascript, NodeJS, OOP, Express.JS, Sequelize, mySQL, MVC architecture, Handlebars.js, Express-session, Bcrypt, dotenv

FRONT END DEVELOPER
CONCERT CRAWLERS, Github: https://github/DelgaMatt/ConcertCrawler
Deployed App: https://delgamatt.github.io/ConcertCrawler/
- Finds concerts in any given location and displays concert information and link to purchase tickets
- The application provides a user friendly interface and accesses/displays concert data via Google and Ticketmaster API from all over the world. I assisted in the creation of the application's MVP, Leading Tailwind implementation, Contact Page development and local storage.
- Tools: HTML5, CSS, JavaScript, JQuery, Tailwind, Font Awesome

WORK EXPERIENCE

COCKTAIL SERVER

WILDFIN AMERICAN GRILL, VANCOUVER WA

July 2020 - present

Attend to guests in a timely and professional manner. Offer strong knowledge and recommendations on menu items and recipes, craft cocktails, beer and wines. Utilize time management and running multi-course meals. Run food and manage side-work at all times during shift. Assist where is needed.

COCKTAIL SERVER, BAR BACK, HOST, BUSSER, LEAD PREP COOK*

HUDSON'S BAR AND GRILL, VANCOUVER WA

December 2012 – July 2020

Familiarize guests with menu and daily specials, rotating beers and cocktails. Assist bartender with making drinks and beers. Maintain stocking spirits, beers, wines and bar ingredients. *Track and complete prep list in scratch kitchen. Multitasking and time management/prioritization.

EDUCATION

FULL-STACK CODING BOOT CAMP, University of Oregon – Certificate of Completion

ASSOCIATES OF ARTS, Lane Community College, Eugene Oregon
